

Field of study **Sciences and engineering**

Training available in

Initial training

Recognition of prior learning

How to apply :

<https://www.univ-gustave-eiffel.fr/en/formation/applications-and-enrolment/applications>

Course venue :

Campus Marne la Vallée - Champs sur Marne - Bâtiment Copernic 5 Boulevard Descartes 77420 Champs-sur-Marne

Calendar :

Contacts :

ROTH Julien (L3)
Academic coordinator
julien.roth@univ-eiffel.fr

DELEVAL Luc (L3)
Academic coordinator
luc.deleaval@univ-eiffel.fr

BARTOLI Brigitte (L3)
Academic secretary
Brigitte.Bartoli@univ-eiffel.fr
Phone number : 01 60 95 77 03
Office : 2B185

Bachelor's degree Mathematics Mathematical engineering

UFR de Mathématiques (MATHS)

Bachelor's degree L3

TO GET THERE

2nd Year or similar level of a graduate course in Mathematics

ACQUIRED SKILLS

Autonomy of reasoning, theoretical foundations necessary for abstract thought, command of fundamental concepts in analysis, algebra, probability and statistics, and geometry. Understanding and analysing a problem connected with mathematics, discussing the findings and setting up a model for a problem.

YOUR FUTURE CAREER

The Licence in Mathematics mainly leads to a Master's in Mathematics, either in Pure or Applied Mathematics, or in Actuarial Science. The major engineering schools also recruit students at the end of their 3-year degree, on the basis of results and competitive examination. At Université Gustave Eiffel, we offer further study in the Mathematics and Applications Master's programme, the Careers in Teaching, Education and Training Master's programme for those intending to go into teaching, and the Actuarial Science Master's programme.

BENEFITS OF THE PROGRAM

The degree in Mathematics is designed to provide students with the theoretical foundations and basic knowledge in the field together with a strong grounding in Computer Science. Because of its specific nature (teaching in two fields from the first year), it is an original course offering compared to traditional preparatory classes or general science degrees, for example. By the end of undergraduate studies, it gives students a very high level of knowledge and skills in mathematics and computer science.

More information

PROGRAM

SEMESTER 5

Introduction à la théorie des espaces vectoriels normes (ECTS:6)
Introduction à la théorie de l'intégration et probabilités (ECTS:9)
Mathématiques numériques et Python (ECTS:6)
Analyse numérique matricielle (ECTS:6)
Anglais (ECTS:3)

SEMESTER 6

Statistiques (ECTS:6)
Optimisation
Equations différentielles ordinaires (ECTS:6)
Algèbre Option A (ECTS:6)
Compléments d'intégration et analyse Hilbertienne Option B (ECTS:6)
Stage Option A (ECTS:6)
TPE Option B (ECTS:6)
