Bachelor's degree Geography and Planning Education

UFR de Sciences Humaines et Sociales (SHS)

Bachelor's degree L3

TO GET THERE

Holder of an L2 in Geography, initial full-time training, open to continuous training, open to VAE

ACQUIRED SKILLS

The Geography and Planning Licence equips students with both general knowledge in the subject area as well as skills which are valued in a large number of industry sectors. Students develop their analytical and critical skills as regards documents and discussions. Emphasis is placed on developing their written and verbal communication skills and on using tools effectively. Graduates of this training programme are proficient in a wide range of expertise:

- knowledge of spaces at all levels, from the local (urban) to the global (North-South relations, environmental and economic issues);
- concrete and rigorous methods in individual work (documentary research and field surveys);
- an introduction to career plans (urban planning and development, knowledge of institutions, awareness of stakeholder conflicts);
- knowledge of the social issues of geography and land use planning policies;
- expertise in terms of data analysis and summary communication (mapping, statistics, field placements).

YOUR FUTURE CAREER

Students on this pathway go on to do the Master's in Careers in Teaching, Education and Training for primary or secondary schools in order to prepare for the competitive examination for primary, middle school or secondary school teachers. It is also possible to choose another Master's degree, such as those offered at Université Gustave Eiffel: Spaces, Societies and Territories (jointly accredited with the UPEC), Urban Planning and Development (EUP), Territorial Cultural Development or Culture and Web Careers.

BENEFITS OF THE PROGRAM

After a multi-disciplinary first year (geography, history, sociology) and gradual specialisation from the second year, the L3 Geography Education pathway provides general training in human geography and skill sets to prepare students fully for a career in teaching. Students planning to take the primary teacher recruitment examination (CRPE) are offered a pre-professional training course and teaching methodology courses in history and geography as well as courses in mathematics and French. Students planning to take the CAPES (secondary school teaching certificate) are offered a pre-professional training course and courses in historiography, epistemology and history of education, as well as training for the oral part of the competitive examination.
