Bachelor's degree Geography and Planning Social and Cultural Geography

UFR de Sciences Humaines et Sociales (SHS)

Bachelor's degree L3

TO GET THERE

Holder of an L2 in Geography, initial full-time training, open to continuous training, open to VAE

ACQUIRED SKILLS

The Geography and Planning Licence equips students with both general knowledge in the subject area as well as skills which are valued in a large number of industry sectors. Students develop their analytical and critical skills as regards documents and discussions. Emphasis is placed on developing their written and verbal communication skills and on using tools effectively. Graduates of this training programme are proficient in a wide range of expertise: - knowledge of spaces at all levels, from the local (urban) to the global (North-South relations, environmental and economic issues); - concrete and rigorous methods in individual work (documentary research and field surveys); - an introduction to career plans (urban planning and development, knowledge of institutions, awareness of stakeholder conflicts); - knowledge of the social issues of geography and land use planning policies; - expertise in terms of data analysis and summary communication (mapping, statistics, field placements).

YOUR FUTURE CAREER

This general training prepares students for geography-related professions as well as for all professions which require knowledge about geography and planning.

If students obtain a Master's degree after graduating, they can apply for careers in: Urban planning and development research officer, Urban planning and development project manager, Local government attaché, Local government editor, as well as to teaching professions (see the RNCP list (National Directory of Professional Certification)).

The Master's in Urban Planning and Development at the Paris School of Urban Planning (EUP) is the main follow-up for students focusing on Urban studies and is in high demand by students from geography pathways. The Spaces, Societies and Territories Master's, jointly accredited with UPEC, is the second sector chosen. It offers both professional and research opportunities. The European and International Studies Master's programme is chosen by many students at the end of their Geography pathway. Teaching Master's (both primary and secondary school teaching certificates) are also in high demand. Finally, the two specialities Web Careers and Cultures and Territorial Cultural Development are selected by fewer students.

BENEFITS OF THE PROGRAM

After a multi-disciplinary first year (geography, history, sociology) and gradual specialisation from the second year, the L3 Social and Cultural Geography pathway provides general training in human geography. The training is delivered by experts in different cultural areas in urban, rural and social geography. This pathway offers the widest possible choice of Master's courses, from planning through to research. International partnerships offer numerous opportunities for international mobility.
