Bachelor's degree Geography and Planning Digital Societies and Cultures

UFR de Sciences Humaines et Sociales (SHS)

Bachelor's degree L3

TO GET THERE

Holder of an L2 in Geography, initial full-time training, open to continuous training, open to VAE

ACQUIRED SKILLS

In addition to general knowledge in the discipline, the third year pathway in Geography - Digital Societies and Cultures allows students to acquire valuable skills in many sectors of activity. Students are encouraged to develop their skills in analysing and critiquing documents and holding debates, particularly on digital issues. Emphasis is placed on developing skills in written and oral expression and mastering digital tools. Graduates of this training programme are proficient in a wide range of expertise: - knowledge of spaces at all levels, from the local (urban) to the global (North-South relations, environmental and economic issues); - concrete and rigorous methods in individual work (documentary research into digital humanities and field surveys); - an introduction to career plans (urban planning and development, knowledge of institutions, awareness of stakeholder conflicts); - knowledge of the social issues of geography and land use planning policies; - expertise in terms of data analysis and summary communication (mapping, statistics, field placements).

YOUR FUTURE CAREER

Students following this pathway generally pursue their studies with the Master's in Cultures and Professions of the Web or in Change Management and Sociology of Human Resources. It is also possible to choose another Master's degree such as those offered at Gustave Eiffel: Master's degree in Urban Planning and Development from the École d'Urbanisme de Paris, Master's degree in Spaces, Societies, Territories (co-accredited with the UPEC) or Territorial Cultural Development.

BENEFITS OF THE PROGRAM

After a first multidisciplinary year (geography, history, sociology) and progressive specialisation from the 2nd year, the L3 Digital Societies and Cultures pathway offers general training in human geography and in-depth studies in digital societies and cultures. The training is delivered by experts in different cultural areas in urban, rural and social geography and experts in digital humanities.
