UFR de Sciences Humaines et Sociales (SHS)

Bachelor's degree L3

TO GET THERE

L3: French and EU students: submit application via the Université Gustave Eiffel website.

Students from outside the EU: Campus France according to country of origin.

ACQUIRED SKILLS

Students from the L3 Sociology Urban Studies pathway are proficient in three major "core" skills:

- study (which is normally associated with preparing planning documents and urban planning projects as well as in drafting territorial development strategies);
- management (which is applied to project management such as in managing spaces and urban infrastructure/installations;
- and design (which not only concerns urban space architecture and development but also comprises a host of design approaches, including institutional, which are related to city production).

These core professional skills are required for various fields of urban action: local development, urban service, installation and event management, transports and mobility, housing, urban social policies, the environment and sustainable development. In these fields, career opportunities are generally found at Master's level. The preferred course of study is therefore a three-year course, and includes a pre-professionalisation urban studies year followed by two years of Master's in one of the Master's programmes proposed by the Paris School of Planning (EUP).

YOUR FUTURE CAREER

Students following this pathway generally pursue their studies with the Urban Planning and Development Master's at the Paris School of Planning (EUP). It is also possible to choose another Master's degree, such as those offered at Université Gustave Eiffel: Spaces, Societies and Territories (jointly accredited with the UPEC), Territorial Cultural Development or Culture and Web Careers. If students obtain a Master's degree after graduating, they can apply for careers in: Urban planning and development research officer, Urban planning and development project manager, Local government attaché, Local government editor, as well as to teaching professions (see the RNCP list (National Directory of Professional Certification)).

BENEFITS OF THE PROGRAM

After a multi-disciplinary first year (geography, history, sociology) and gradual specialisation, the L3 Urban Studies pathway provides general training in sociology and in-depth studies in urban planning. The training is delivered by sociologists and geographers who specialise in different cultural areas in urban, rural and social geography and experts in urban planning and development.
