Career opportunities: Teacher in higher education, Researcher, Task officer with public institutions (local authorities, ministries, intergovernmental organisations), Project manager with NGOs, associations or design offices, Civil service executive

BENEFITS OF THE PROGRAM

The Spaces, Societies, Territories Master's degree is a research degree in critical social geography. Its uniqueness lies in the relationships developed between lecturer-researchers at UPEC and Université Gustave Eiffel. Our training programme transcends the traditional compartmentalisation of urban and rural spaces, of North and South, and gives students the keys to reflecting on the spatial dimension of domination relationships. The focus on inequalities and on issues of power forge the identity of this Master's degree. It questions sustainable development, urban planning and development and social integration from a highly critical standpoint.
