Master's degree Social and Solidarity Economics Social Protection Engineering and Mutuals

Institut Francilien d'ingénierie des Services (IFIS)

Master's degree M2

TO GET THERE

Access to the Social and Solidarity Economy Master's in Social Protection Engineering and Mutuals is open to students who have completed four years of higher education in connection with the field of social protection (principal schemes and mutual insurance). Lifelong learning applicants who do not have this level of training may still be admitted through the validation of professional experience process.

The selection process takes place in two stages: pre-selection on the basis of application, followed by an admission interview, after which a panel of judges decides whether or not to admit the pre-selected candidates.

ACQUIRED SKILLS

The course aims to develop students' skills through a work-study programme with time spent in a company and at the University:

- Acquire managerial skills in team and project management using appropriate technological tools, administrative productivity tools and reporting and budget monitoring tools in the framework of information systems applied to health and social data
- Develop legal skills (labour law, social security law, European social law) and managerial skills for managing the performance of a social protection organisation (accounting, financial analysis, management control, budget, internal auditing).

YOUR FUTURE CAREER

At the end of the course, graduates can apply for the following jobs:

- Senior manager in organisations covering the 8 risks: illness, occupational illness, old age, family, employment, housing, poverty and disability.
- Senior executive in basic and top-up social protection organisations (CPAM, MSA, RSI, special schemes, AGIRC-ARRCO, mutuals, providence institutions, Pôle Emploi, CNAV, UNEDIC, etc.)

They can also pursue research in the field of social protection.

BENEFITS OF THE PROGRAM

- Between 20 and 25 students.
- In partnership with EN3S, the course involves a network of recognised experts and professionals, ensuring it is grounded in the professional world. It is open to apprentices and accepts several lifelong learning students each year.
