UNIVERSITÉ GUSTAVE EIFFEL

## Master's degree Urban Planning and Development Housing and Urban Renewal

École d'Urbanisme de Paris (EUP)

Master's degree M2

#### TO GET THERE

This course is aimed at students with an M1 or equivalent degree, who have knowledge in urban planning and development and wish to develop their skills in order to work in housing, and housing, urban and urban renewal policy in residential areas.

#### ACQUIRED SKILLS

It targets the following skills: diagnosis, forecasting and local observation for public policy, strategy and projects (urban, real estate or urban renewal); consulting and support for public and private stakeholders in this area; coordinating and steering initiatives within larger projects, in all phases; coordinating the city's urban and social management policy programmes; organising relations between project managers, contractors, residents, users and managers of property complexes; mobilising knowledge, methods and tools to propose adapted and innovative solutions in the various activities involved in jobs in housing and urban renewal.

#### YOUR FUTURE CAREER

Graduates may work in: management roles in housing departments of institutions that handle such policy; consulting and support for these initiatives and projects, steering, development and management of social housing; private property operations management; coordination for the city's policy missions, etc.

They may work at local authorities, social housing bodies, property developers, consulting firms, associations and foundations specialised in housing for people in need, etc. Though the work-study course prepares graduates to work in the industry straight away, they are also completely capable of pursuing a PhD if they wish to do so.

#### BENEFITS OF THE PROGRAM

The programme's pedagogical format, with students alternating between working at a company and studying at EUP, serves three objectives: provide students with transversal knowledge through the curriculum, so that they master the fundamental aspects needed to understand and analyse issues related to the field of housing and urban renewal; help them acquire and master specialised professional skills and know-how, thanks to their long-term integration in the workplace; encourage them to adopt reflective and analytical practices, by bringing these different types of experience into conversation with each other.
