Bachelor's degree Sociology

UFR de Sciences Humaines et Sociales (SHS)

Licence L3

TO GET THERE

Undergraduate students completing their second year of sociology studies with an interest in environmental issues.

ACQUIRED SKILLS

YOUR FUTURE CAREER

Master's degrees in sociology focusing on the environment, socio-ecological transitions, natural hazards, and environmental policy.

BENEFITS OF THE PROGRAM

The specific courses offered in this program provide a solid introduction to environmental issues (environmental history, geography of natural resources, environmental sociology). This foundation then allows students to participate in a scientific reading seminar introducing them to environmental research, and a workshop focused on environmental action and digital technology. Students can then apply for master's programs that address the issue of environmental transitions
