MASTER (EN) M2

ENTRY REQUIREMENTS

Access to the Social and Solidarity Integration and Entrepreneurship pathway (SSIE) is open to all students with a fourth-year postgraduate diploma, i.e. who have 180 credits. Continuing training students who have not reached this training level can still access the training program via the Validation of Acquired Experience procedure.

There are two stages to the selection process: a preliminary selection based on applications, then an admission interview after which a selection board states whether or not the pre-selected candidates have been admitted.

ACQUIRED SKILLS

The training program aims to develop students' skills in the development of IEA (integration through economic activity) structures (work integration enterprises, intermediary associations, temporary work integration enterprises, régie de quartier (neighbourhood development), job integration workshops) and socially-beneficial solidarity enterprises (SSE law) in general. These skills include:

- 1) general skills for understanding the economic, legal and political environment of these structures
- 2) management skills (creating dashboards, monitoring accounting operations, management indicator practices, human resource management)
- 3) social developer skills (local knowledge of audiences, detecting new markets with a social dimension, implementing public and solidarity funding, supporting people, etc.).

YOUR FUTURE CAREER

At the end of this Master's degree, graduates may move into the following professions:

Senior executives of integration through economic activity structures (IEAS)

Senior executives of socially-beneficial solidarity enterprises

Integration project lead in integration through economic activity structures or regional authorities

SSE (social and solidarity economy) task officer in regional authorities or SSE networks

BENEFITS OF THE PROGRAM

The training program is integrated in the Paris Est Marne-la-Vallée University Social and Solidarity Economy Chair which fosters a large number of partnerships with players in the field through its research actions and its many events such as its gatherings of researchers and players or its solidarity alternatives video festival.

It is a work-study training program open to apprenticeship and continuing training.
